PHILOSOPHICAL MAGAZINE B, 1990, VOL. 62, NO. 6, 685–690

SUBJECT INDEX

Vol. 62

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
a-As_2Se_3, distribution of gap states in	79 B
a-carbons, electronic and structural properties of	243 B
a-$Ge_xSe_y(a)_z$(a = Bi, Ga, Sb), plasmon energies of	71 B
a-P_2Se and a-Si : H, photoluminescence spectroscopy of	47 B
a-Se, deep-hole capture cross-section in	377 L
a-Si, electronic transport in	509 B
a-SiC films, electronic and optical properties of	213 B
a-SiC films, structure and composition of	193 B
a-SiC : H films, Al doped	527 B
a-Si-Ge : H, Raman-backscattering on	59 B
a-Si : H, effect of SiH_4 on optical properties	19 B
a-Si : H, structural model of	271 B
a-Si : H, transport and recombination in	5 B
a-Si : H alloys, thermal equilibrium and bandgap in	119 L
a-Si : H and a-P_2Se, photoluminescence spectroscopy of	47 B
a-Si : H/c-Si HBT, emitter conductivity of	89 B
a-SiN : H films, optical spectra of	261 B
Ag and Au, atom displacement in	67 L
Ag and Ni, many-body anharmonic interactions in	377 A
Aggregated KCl : Cd^{2+} and KCl : Mn^{2+}	215 L
Al–20 at.% Mn, quasicrystalline transformation in	157 A
Al–Cu–Fe alloys, quasicrystals in	357 L
Al–Cu–Fe quasicrystals, heat treatment of	183 L
Al–Pd–Mn quasicrystal, chemical ordering in	95 L
Al_3Ti and Al_3V, deformation mechanisms in	143 L
$Al_{65}Cu_{20}Co_{15}$, structure refinement of	175 L
Alkali metal–alkali halide solutions, structure of	351 B
Alloys, superlattice, ordering in	395 B
AlMnSi alloys, icosahedral, structure of	577 B
Aluminium, grain boundaries in	327 L
Aluminium, phonon energies in	203 L
Aluminium, sodium particles in	647 B
Aluminium nitride, dislocations in	83 L
Amorphization, nucleation in	455 B
Amorphous semiconductor films, reflectance of	299 L
Amorphous semiconductors, recombination in	537 B
Annealing of induced defects in tantalum	173 A
As–Te glasses, high pressure studies of	553 B
Au and Ag, atom displacement in	67 L
Bi–Pb–Sr–Ca–Cu–O, dislocations and grain boundaries in	585 A
Bi-permeated copper bicrystal, fracture surface of	125 L
Binary alloy melts, undercooling in	337 B
Binary alloys, thermodynamic properties of	173 B
Binary alloys, vacancy complexes in	241 A
Binder effect in molecularly doped polymers	61 L

	PAGE
Carbon, amorphous, electronic and structural properties of	243 B
Carbon ordering in cubic carbide phases	221 L
Cathodoluminescence in CdS	329 B
CBED patterns of $PrCo_5$	187 L
CdS, cathodoluminescence of	329 B
CdTe, dislocations in	435 B
Cement paste, defect free, R-curve behaviour in	347 A
Chalcogenide glasses, diffusion of silver in	107 L
Charge density and scattering factors of zinc	291 L
Chemical potentials in solid solutions, evaluation of	159 B
Chi-phase precipitation in Mb–Rh alloys	29 A
Close-packed structures, domain boundaries in	329 B
Coherent ordered precipitates, strengthening by	33 L
Coherent precipitates, strain contrast of	655 A
Combustion synthesis of diamond	283 L
Composite SiC/Si_3N_4 whiskers, structure of	000 L
Composites of SiC/LAS, microstructure of	607 A
CoO and NiO, diffusion of transition metal ions in	473 A
Copper, dislocations in at 77 K	635 A
Copper bicrystal, Bi-permeated, fracture surface of	125 L
Copper-decorated twin boundaries in silicon	407 L
Correlations, sequential, in non-local relaxation	399 L
$CoSi_2/Si(111)$ interface, image contrast at	183 A
Coulomb gap, thermodynamical treatment of	371 L
Creep behaviour of dry olivine	233 L
Creep cavity surfaces, Sb enrichment on	25 L
Cu_3Au, superdislocations in.	53 A
Cubic alloys, random, stability of	149 B
Cubic carbide phases, carbon ordering in	221 L
Decagonal $Al_{65}Cu_{20}Co_{15}$, structure refinement of	175 L
Defect energies in transition metal oxides	487 A
Deformation mechanisms in Al_3Ti and Al_3V	143 L
Deformation recovery on Eu_2O_3 surfaces	323 L
Diamond, growth of by combustion	283 L
Diamond, photoluminescence microtomography of	597 B
Diamond, type Ia, size and infrared frequency in	115 B
Diamond, type Ib, nitrogen content of	589 B
Dicyanoquinonediimine, Fermi surface of salts of	195 L
Dielectrics, glassy, activation energies in	139 B
Diffusion in $L1_2$-type alloys.	499 A
Diffusion of grain boundaries, regimes for	227 A
Diffusion of transition metal ion in CoO and NiO	473 A
Diffusivity, X-ray absorption corrections for	365 L
Dilatancy, sphere packings and settling	423 L
Disclinations, surface dislocations and grain boundaries	19 L
Dislocation densities in $Ge_xSi_{1-x}/(001)Si$	167 L
Dislocation dynamics in piezoelectric crystals	275 A
Dislocation mobility in ice	89 A
Dislocation pairs in the $L1_2$ structure	77 A
Dislocation reactions in TiAl	159 L
Dislocation/stacking fault interactions in InP	103 A
Dislocations, imaging of	227 L
Dislocations, interaction with grain boundaries	131 A
Dislocations, Lomer, dissociation of	247 L
Dislocations and surface phenomena in Eu_2O_3	431 A
Dislocations and twin boundaries in Cu_3Au	53 A
Dislocations in aluminium nitride	83 L

PAGE

Dislocations in Bi–Pb–Sr–Ca–Cu–O . . . . . 585 A
Dislocations in CdTe . . . . . 635 A
Dislocations in copper at 77 K . . . . . 635 A
Dislocations in GaAs/Si interfaces . . . . . 319 A
Dislocations in h.c.p. crystals . . . . . 525, 545 A
Dislocations in heteroepitaxial deposits . . . . . 139 L
Dislocations in InGaAs/GaAs heterolayers . . . . . 131 L
Dislocations in semiconductor heterostructures . . . . . 115 A
Dislocations in SiC, neutron-induced . . . . . 421 A
Dislocations in SiC on (001)Si . . . . . 239 L
Dislocations in Ti_3Al . . . . . 153 L
Dislocations in YBaCuO . . . . . 575 A)
Disordered systems, binary, sphere models for . . . . . 469 B
Displacive transformations in the dodecagonal phase . . . . . 349 L
Dodecagonal phase, displacive transformation in . . . . . 349 L
Dodecagonal phase, quasicrystal transition in . . . . . 337 L
Domain boundaries in close-packed structures . . . . . 329 A

Edge-dislocation loops in β-NiAl . . . . . 317 L
Elastic behaviour of indium under pressure. . . . . 311 B
Elasticity in Mn–7 at.% Cu . . . . . 511 A
Electron relaxation following ion implantation . . . . . 209 L
Emitter conductivity of an a-Si:H/c-Si HBT . . . . . 89 B
Energy-loss studies of Fe–Cr–Mn oxide films . . . . . 229 B
Entropy of superconducting transition . . . . . 37 L
Eu_2O_3, dislocations and surface phenomena in . . . . . 431 A
Eu_2O_3 surfaces, deformation recovery on . . . . . 323 L

Fe–Cr–Mn oxide films, energy-loss studies of . . . . . 229 B
Fermi surface of salts of dicyanoquinonediimine . . . . . 195 L
Foam, evolution of in frustrated froth . . . . . 417 L
Frustrated froth, evolution of foam in . . . . . 417 L

$Ga_{1-x}Fe_xNiCo_4$ and $Zn_{1-x}Cu_xAl_2O_4$, structure of . . . . . 103 B
GaAs, interfacial reactions in gold-based contacts to . . . . . 283 A
GaAs/Si interfaces, dislocations in . . . . . 319 A
Gallium antimonide, plastic deformation of. . . . . 203 A
Gap states in a-As_2Se_3 . . . . . 79 B
Ge_xSi_{1-x}/(001)Si, dislocation densities in . . . . . 167 L
Ge/Ti multilayers, ion-sputtered, structure of . . . . . 415 B
Glass-forming liquids, viscosity of . . . . . 225 B
Glassy dielectrics, activation energies in . . . . . 139 B
Grain boundaries, disclinations and surface dislocations . . . . . 19 L
Grain boundaries, interaction of with dislocations . . . . . 131 A
Grain boundaries and liquid films, migration of . . . . . 465 A
Grain boundaries in aluminium . . . . . 327 L
Grain boundaries in b.c.c. metals. . . . . 447 A
Grain boundaries in Ni_3Al . . . . . 659 B
Grain boundary diffusion, C and B regimes . . . . . 227 A
Grain boundary phase in submicrometre-grained iron . . . . . 253 L
Grain orientation in $YBa_2Cu_3O_{7-x}$ thin films . . . . . 77 L

h.c.p. crystals, dislocations in . . . . . 525, 545 A
Heteroepitaxial deposits, dislocations in . . . . . 139 L
High-pressure studies of As–Te glasses . . . . . 553 B

Ice, dislocation mobility in . . . . . 89 A
Icosahedral AlMnSi alloys, structure of . . . . . 577 B

	PAGE
Icosahedral Al–Pd–Mn, chemical ordering in	95 L
Icosahedral phase of TiCrSi alloys	265 L
Icosahedral transformations, soft modes in	393 L
Image contrast at the $CoSi_2$/Si(111) interface	183 A
Imaging of dislocations	227 L
In particles in Al, nucleation of	557 A
Indentation cracking of tempered soda-lime	1 A
Indium, elastic behaviour of under pressure	311 B
InGaAs/GaAs heterolayers, dislocations in	131 L
InP, hillock formation in	103 A
Interfacial reactions in gold-based contacts to GaAs	283 A
Ion damage in ruthenium	619 A
Ion implantation, electron relaxation after	209 L
Iron, grain-boundary phases in	253 L
Iron–cobalt alloys, magnetic annealing in	9 L
Irradiation tracks in zircon	395 A
KCl:Co^{2+} and KCl:Mn^{2+}, characterization of	215 L
Kinematic evolution, surface reproducibility condition in	305 L
Kinetics of formation in an isotopic polymer blend	129 B
$KMgF_3$ and $KZnF_3$, spin–lattice coupling of Ni^{2+} in	115 L
$L1_2$ structure, dislocation pairs in	77 A
$L1_2$ type alloys, diffusion in	499 A
Langmuir–Blodgett structures of tricosenoic acid	101 L
Liquid films and grain boundaries, migration of	465 A
Liquids, glass-forming, viscosity of	225 B
Liquids and solids, behaviour of	363 A
Lomar dislocations, dissociation of	247 L
Magnetic annealing in iron–cobalt alloys	9 L
Metallic alkali metal–halide solutions, structure of	351 B
Mn–7 at.% Cu, elasticity in	511 A
Molybdenum–rhenium alloys, precipitation in	29 A
Multilayers, Fe/Ti, structure of	415 B
Neutron-irradiation damage in $YBa_2Cu_3O_{7-x}$	41 L
Ni^{2+}, spin–lattice coupling of in $KMgF_3$ and $KZnF_3$	115 L
Ni and Ag, many-body anharmonic interactions in	377 A
NiAl, edge-dislocation loops in	317 L
Ni_3Al, grain boundaries in	659 B
Nickel, solute–dislocation interaction energy in	289 B
Nickel-based crystals, stacking faults in	253 A
NiO and CoO, diffusion of transition metal ions in	473 A
NiTi, amorphous, shear instability of	257 L
Nitrogen content of Ib diamond	589 B
Nonlinear optical materials, topography of	1 L
Nucleation of In particles in Al	557 A
Nucleation in solid state amorphization	455 B
Olivine, creep behaviour of	233 L
Oxides, solid solution, computer simulation of	267 A
Phase-shift analysis of modulated photocurrents	29 B
Phonon energies in aluminium	203 L
Phosphors, ZnS doped, microstructure of	387 A
Photocurrents, phase-shift analysis of	29 B
Photoluminescence microtomography of diamond	597 B

PAGE

Piezoelectric crystals, dislocation dynamics in . . . . . 275 A
Plasmon energies of a-$Ge_xSe_y(a)_z$(a = Bi, Ba, Sb) . . . . . 71 B
Plastic deformation of gallium antimonide . . . . . 203 A
Platelet size and infrared frequency in Ia diamond . . . . . 115 B
Polymer blend, kinetics of formation of . . . . . 129 B
Polymers, molecularly doped, binder effect . . . . . 61 L
Potts model of coarsening soap froth . . . . . 615 B
$PrCo_5$, CBED patterns of . . . . . 187 L

Quasicrystal transition in the dodecagonal phase . . . . . 337 L
Quasicrystalline Al–Cu–Fe, heat treatment of . . . . . 183 L
Quasicrystalline transformation in Al–20 at.% Mn . . . . . 157 A
Quasicrystals in Al–Cu–Fe alloys . . . . . 357 L

R-curve behaviour in defect-free cement paste . . . . . 347 A
Raman-backscattering on a-Si–Ge:H . . . . . 59 B
Random cubic alloys, stability of. . . . . 149 B
Rapidly solidified $V_{40}Co_{43}Si_{17}$, structures of . . . . . 563 B
Recombination in amorphous semiconductors . . . . . 537 B
Recovery creep equation, formulation of . . . . . 383 L
Relaxation, non-local, sequential correlations in . . . . . 399 L
Ruthenium, heavy-ion damage in . . . . . 619 A

Sb enrichment on creep cavity surfaces . . . . . 25 L
Se, amorphous, deep-hole capture cross-section in . . . . . 377 L
Semiconductor heterostructures, dislocations in . . . . . 115 A
Semiconductor films, amorphous, reflectance of . . . . . 299 L
Shear instability in amorphization of NiTi . . . . . 257 L
SiC, neutron-induced dislocations in . . . . . 421 A
SiC films, amorphous, electronic and optical properties of . . . . . 213 B
SiC films, amorphous, structure and properties of . . . . . 193 B
SiC on (001)Si, dislocations in . . . . . 239 L
Si–C:H amorphous films, Al doped . . . . . 527 B
SiC:LAS composites, microstructure of . . . . . 607 A
SiC:Si_3N_4 composite whiskers, structure of . . . . . 000 L
Si:H, amorphous, structural model of. . . . . 271 B
SiH_4, effect of on optical properties of a-Si:H . . . . . 19 B
Si:H alloys, amorphous, thermal equilibrium and bandgap in . . . . . 119 L
Silicon, amorphous, electronic transport in . . . . . 509 B
Silicon, copper-decorated twin boundaries in . . . . . 407 L
Silver, diffusion of in chalcogenide glasses . . . . . 107 L
SiN:H films, amorphous, optical spectra of . . . . . 261 B
Soap froth, Potts model of coarsening in . . . . . 615 B
Soap froth, two-dimensional, statistics of . . . . . 427 L
Soda-lime glass, thermally tempered . . . . . 1 A
Sodium particles in aluminium . . . . . 647 B
Soft modes in icosahedral transformations . . . . . 393 L
Solid solution oxides, computer simulation of . . . . . 267 A
Solid solutions, chemical potentials in. . . . . 159 B
Solids and liquids, behaviour of . . . . . 363 A
Solute–dislocation interaction energy in nickel . . . . . 289 B
Specific-dislocation anomaly in high-T_c superconductors . . . . . 277 L
Sphere models for binary disordered systems . . . . . 469 B
Sphere packings, settling and dilatancy . . . . . 423 L
Stacking faults in nickel-based crystals . . . . . 253 A
Strain contrast of coherent precipitates . . . . . 655 A
Strengthening by coherent ordered precipitates . . . . . 33 L
Stress and the recovery creep equation . . . . . 383 L

PAGE

Substitutional alloys, tracer diffusion coefficients in . . . . . 597 A
Superconducting transition, entropy of . . . . . 37 L
Superconducting YBCO, Hall effect above T_c in . . . . . 273 L
Superconductivity, high-T_c, specific-heat anomaly in . . . . . 277 L
Superconductors, YBaCuO, structure images of . . . . . 311 L
Superlattice alloys, ordering in . . . . . 395 B
Surface reproducibility condition during kinematic evolution . . . . . 305 L

Tantalum, induced defects in . . . . . 173 A
Ternary and quaternary III–V compounds, disorder in . . . . . 373 B
Thermodynamic properties of binary alloys . . . . . 173 B
Thermodynamical treatment of the Coulomb gap . . . . . 371 L
III–V compounds, disorder and size effect in . . . . . 373 B
Ti_3Al, dislocations in . . . . . 153 L
TiAl, elastic constants and fault energies in . . . . . 159 L
TiCrSi alloys, icosahedral phase in . . . . . 265 L
Tilt boundaries in b.c.c. metals . . . . . 447 A
Topography of nonlinear optical materials . . . . . 1 L
Tracer diffusion coefficients in substitutional alloys . . . . . 597 A
Transition metal oxides, defect energies in . . . . . 487 A
Transport and recombination in a-Si:H . . . . . 5 B
Tricosenoic acid, LB structures of . . . . . 101 L
Tweed structure in Y–Ba–Cu–O oxides . . . . . 51 L
Two-dimensional soap froth, statistics of . . . . . 000 L

Undercooling in binary alloy melts . . . . . 337 B
$V_{40}Co_{43}Si_{17}$, rapidly solidified, structures of . . . . . 563 B
Vacancy complexes in binary alloys . . . . . 241 A

X-ray absorption correction for diffusivity . . . . . 365 L

YBaCuO, dislocations in . . . . . 575 A
YBaCuO, Hall effect above T_c in . . . . . 273 L
$YBa_2Cu_3O_{7-x}$, neutron damage in . . . . . 41 L
$YBa_2Cu_3O_{7-x}$ films, grain orientation in . . . . . 77 L
YBaCuO oxides, tweed structure in . . . . . 51 L
YBaCuO superconductors, structure images of . . . . . 311 L

Zinc, charge density and scattering factors of . . . . . 291 L
Zircon, heavy-ion irradiation tracks in . . . . . 395 A
$Zn_{1-x}Cu_xAl_2O_4$ and $Ga_{1-x}Fe_xNiCoO_4$, structure of . . . . . 103 B
ZnS phosphors, doped, microstructure of . . . . . 387 A

In French
Pyramides de fautes d'empilement dans la phase $Li_2Ni_{7.5}Al_9Ti_{14}Cr_{3.5}$ . . . . 89 L
